

April 1997

**TOPIC: ENGINE INTERRUPTION DURING OPERATION**

**MODELS**

**AFFECTED: PROCUT Z - serial no. 101 - 300**

Field reports have indicated that the parking brake handle bounces during operation causing an engine interruption problem.

To rectify this, a Brake Spring Kit (45129) is available through the Parts Department. This kit includes all necessary components, hardware and installation instructions.

**Please note, this is a mandatory fix.**

\$20 labor will be paid.
