TOPIC: MUFFLER HEAT SHIELD FOR FAST-VAC TRIPLE CATCHER

MODELS

AFFECTED: IS3000ZKAV23/61 - serial no. 101-325

Ferris Industries has determined the **Kawasaki vertical canister-style muffler** on the IS3000Z will damage the grass bag when a FAST-Vac grass catcher is installed.

To prevent damage from occurring, a Muffler Heat Shield Kit (47259) is available through the Parts Department.

Please note, this is a **MANDATORY FIX** that must be installed on all IS3000Z machines with the **Kawasaki vertical canister-style muffler** when installing a FAST-Vac grass catcher.

There is no charge for the kit. No labor will be paid as the cost will be included with the installation of the FAST-Vac grass catcher.
